

## Field Work

1. Using your learnings log and all the other resources posted with this video, spend 1-2 meetings with your team to plan your next Action-Learning experiment.

Invite others from the congregation to participate with you. **This is how your team begins to “infect” the congregation** with the spirit of curiosity and listening-based evangelism!

2. Make sure to schedule time following the experiments to mine the learning from them.
3. Make a plan for how your team can share the learnings and the energy back with various leadership groups, teams, and the whole congregation.
4. Feel free to re-watch this video, or any previous videos, to remind yourself of the learnings there. Share the videos with others in the congregation as they become more curious.
